EXPERIENCE

Hirello.ai – Remote Internship

Dec 2025 – Present

Software Engineer

- Engineered a Gemini AI pipeline linking 1000+ email threads to dashboard cards for one-click conversation access
- Integrated CoreSignal API to render a real-time US job supply and demand map across 50 states and 10+ roles, adding a 24-hour cache layer to eliminate redundant API calls and boost page load performance
- Led the migration of 5 modules and 10+ pages to a redesigned frontend using Vue.js and TypeScript, independently owning the modernization of core product workflows across 4 key features
- Secured 15+ API endpoints by implementing a JWT authentication layer in FastAPI, validating bearer tokens from request headers and cookies across all product surfaces
- Collaborated with 2 cross-functional stakeholders across engineering and product teams to clarify requirements, align priorities, and deliver features on schedule

Harman International – Pune, India

Jan 2022 – Dec 2023

Analytics Engineer

- Streamlined data ingestion and validation into AWS Redshift using Apache Airflow and Python, eliminating 8–10 hours of manual processing per month and strengthening pipeline reliability
- Partnered with client teams to extract and consolidate 200K+ weekly records via SQL, delivering clean datasets to reporting teams and supporting data-driven decisions across accounts
- Designed 7+ client KPI dashboards tracking throughput and service performance metrics, enabling consistent weekly reporting and data-driven decision making across accounts
- Documented data pipelines and dashboards, enabling faster onboarding across 3+ client accounts

The Robotics Forum – VIT, India

Jan 2021 – Dec 2021

Data Analyst

- Processed 500+ robotics sensor datasets using SQL and Python, advancing data quality and reporting accuracy
- Deployed 4+ Tableau dashboards surfacing performance trends and insights for weekly faculty reviews
- Drove logging standardization across 5+ experiment types, establishing data quality standards for the research team

ACADEMIC PROJECTS

Second Brain for YouTube (Next.js, FastAPI, Python, ChromaDB, Supabase)

- Built a full stack AI app converting any YouTube video into a searchable personal knowledge base
- Implemented a RAG pipeline with transcript extraction and timestamp-aware chunking for source-linked answers
- Designed a knowledge vault enabling users to save, organize, and search across all saved videos semantically

FDA Food Recall Intelligence Pipeline (Python, MongoDB, AWS S3, AWS Glue, Airflow)

- Engineered an automated pipeline ingesting 5K+ FDA recall records via openFDA API across 30+ food categories
- Transformed and stored datasets as Parquet files in AWS S3 using Airflow DAGs and cataloged via AWS Glue
- Constructed an interactive dashboard to visualize recall trends by category, state, and date range

SKILLS

Programming & Languages: Python, SQL, JavaScript, TypeScript, PostgreSQL, MySQL, MongoDB, DynamoDB

Backend & APIs: FastAPI, REST APIs, JWT Auth, Gmail IMAP, Gemini API, Docker, Apache Airflow, Pandas, NumPy

Frontend: React, Vue.js, Next.js, Streamlit, Tailwind CSS, HTML, CSS

Cloud & Platforms: AWS (S3, Lambda, Redshift, Athena, Glue), Supabase, ChromaDB, Snowflake, Git, GitHub, Jira

AI & ML: RAG pipelines, LLM integration, Vector search, Prompt engineering

Certifications: [AWS Certified Cloud Practitioner](#), [HackerRank SQL \(Advanced\)](#)

EDUCATION

University of Maryland, Baltimore County (UMBC), Baltimore, MD

Dec 2025

Master of Science in Information Systems

GPA: 3.9

Relevant Courses: Data Mining, SDLC, Advanced Database Projects & Cloud Computing

Vishwakarma Institute of Technology (VIT), Pune, India

May 2022

Bachelor of Technology in Computer Science

GPA: 3.71
